PURPOSE

- The Stocksbridge Towns Fund Board is looking to work with local transport providers to deliver a Stocksbridge bus service which can help to better connect different parts of the town.
-
- The aspiration is to create a regular, reliable, and sustainable service which links with the current public transport services in the town. It will enhance connectivity for residents of the outlying areas and core residential areas within Stocksbridge and Deepcar.
-
- Funding for the Stocksbridge Hopper style service as one of the ten key projects which are aimed at making major improvements across the town.
-
- The survey was organised to assist the board in shaping the detail on the next stage of the proposal.

Residents have their say on plans for new bus service

A survey has been launched this week to help find out what Stocksbridge residents want to see from a proposed new "hopper style" community bus service for the town.

The Stocksbridge Towns Fund Board is looking to work with local transport providers to deliver a local bus service which can help to better connect different parts of the town.

And residents are being given the opportunity to help decide the routes and plans for a new service by taking part in an online survey which can be accessed here: Stocksbridge - new local bus service.

The proposed service is one of the ten projects which make up the £24.1m investment which has been approved by the Department for Levelling Up Housing and Communities.

The aspiration is to create a regular, reliable, and sustainable service which links with the current public transport services in the town - it's hoped that the new service will launch later this year.

The routes we can provide will depend on viability but to assist the board and the service provider to share these proposals we really want to hear the views of local people.
